RESEARCH AWARDS 2011-2012

For the 2011/2012 funding year, ICRF is supporting 69 grants at a total of \$2,480,000. This is broken down as follows:

- 1 Distinguished Chair**
- 9 Research Professorships**
- 1 Clinical Research Career Development Award**
- 17 Research Career Development Awards**
- 33 Project Grants**
- 8 Fellowships**

With the 2011/2012 grants, ICRF's funding has now reached 1,863 grants totaling \$43,115,000.

Among the areas of cancer research directly sponsored by ICRF in 2011/2012 are: studies in bone, brain, breast, colorectal, gastrointestinal, liver, lung, kidney, ovarian, pancreatic, prostate, and uterine cancers; anticancer drug mechanisms, multi-drug resistance, and targeted therapy; leukemia, lymphoma, blood cells, and tumor blood vessel growth (angiogenesis); bone marrow transplantation; expression, regulation, and mutation of genes; growth factors, growth control, and tumor metastasis; viruses, immunotherapy, and vaccine development; protein interactions; oncogenes and tumor suppressor genes, such as p53; and programmed cell death (apoptosis).

AWARD	AWARDEE	INSTITUTION	PROJECT TITLE
PROFESSORSHIPS	Yinon Ben-Neriah, M.D., Ph.D.	Hebrew University/Hadassah Medical School	<i>Dissecting the Role of the Casein Kinase I Family in Gut Physiology and Cancer</i>
	Yehudit Bergman, Ph.D.	Hebrew University/Hadassah Medical School	<i>Genetic and Epigenetic Mechanisms Involved in Oct-3/4-Induced Malignant Transformation</i>
	Howard Cedar, M.D., Ph.D.	Hebrew University/Hadassah Medical School	<i>Regulation of Gene Expression in Animal Cells</i>
	Aaron Ciechanover, M.D., D.Sc.	Technion, Israel Institute of Technology	<i>Ubiquitin-Mediated Generation of NF-κB: Mechanisms and Involvement in Carcinogenesis</i>
	Alberto Gabizon, M.D., Ph.D.	Shaare Zedek Medical Center	<i>Development of Targeted Liposome Formulations of Anti-Cancer Agents</i>
	Avram Hershko, M.D., Ph.D. (Distinguished Chair)	Technion, Israel Institute of Technology	<i>Roles of the Ubiquitin System in the Control of Cell Division and in Cancer</i>
	Ofer Mandelboim, Ph.D.	Hebrew University/Hadassah Medical School	<i>Learning from Viruses: MicroRNAs Controlling Tumor Cell Attack by NK Cells</i>
	Yosef Shiloh, Ph.D.	Tel-Aviv University	<i>New Branches in the ATM-Mediated DNA Damage Response</i>
	Israel Vlodavsky, Ph.D.	Technion, Israel Institute of Technology	<i>Targeting Heparanase, One Molecule with Multiple Functions in Human Cancer Progression</i>
Yosef Yarden, Ph.D.	Weizmann Institute of Science	<i>Control Circuits of Growth Factor Signaling: Relevance to Cancer Progression and Therapy</i>	
CLINICAL RESEARCH CAREER DEVELOPMENT AWARD	Keren Levanon, M.D., Ph.D.	Chaim Sheba Medical Center	<i>Genetic Events Underlying Serous Ovarian Carcinogenesis</i>

AWARD	AWARDEE	INSTITUTION	PROJECT TITLE
BARBARA S. GOODMAN ENDOWED RCDA FOR PANCREATIC CANCER	Ziv Gil, M.D., Ph.D.	Tel-Aviv Sourasky Medical Center	<i>Role of Nerve Growth Factors in Neuropathic Pain and Invasion of Pancreatic Cancer</i>
RESEARCH CAREER DEVELOPMENT AWARDS (RCDAs)	Rami Aqeilan, Ph.D.	Hebrew University/Hadassah Medical School	<i>Molecular and Cellular Function of Tumor Suppressor Wwox in Osteosarcoma</i>
	Eli Arama, Ph.D.	Weizmann Institute of Science	<i>A Novel Ubiquitin Pathway for the Regulation of Caspase Activation/Apoptosis in Drosophila</i>
	Nabieh Ayoub, Ph.D.	Technion, Israel Institute of Technology	<i>Regulation of the Demethylase Activity of Kdm4 Family</i>
	Shay Ben-Aroya, Ph.D.	Bar-Ilan University	<i>Isolation of Proteins Involved in DNA Repair, via their Proteasome Mediated Degradation</i>
	Galia Blum, Ph.D.	Hebrew University/Hadassah Medical School	<i>Detection and Targeted Therapy of Cancer using Photodynamic Quenched Activity Based Probes</i>
	Neta Erez, Ph.D.	Tel-Aviv University	<i>Characterizing the Role of the Micro-environment in Facilitating Breast Cancer Metastasis</i>
	Zvi Fridlender, M.D.	Hadassah Medical Organization	<i>Characterization and Polarization of Tumor Associated Neutrophils in Thoracic Malignancies</i>
	Yaqub Hanna, M.D., Ph.D.	Weizmann Institute of Science	<i>Uncovering the Role of Oncogenic Pathways in the Induction and Maintenance of Pluripotency</i>
Adi Inbal, Ph.D.	Hebrew University/Hadassah Medical School	<i>The Role of Lmo2 in Angiogenesis</i>	

AWARD	AWARDEE	INSTITUTION	PROJECT TITLE
RCDAs <i>(continued)</i>	Rotem Karni, Ph.D.	Hebrew University/Hadassah Medical School	<i>Characterization of hnRNP A2/B1 as Breast Cancer Metastasis Inducer</i>
	Carmit Levy, Ph.D.	Tel-Aviv University	<i>Exploring miRNA Role in Melanomagenesis towards miR-Based Therapeutic Approaches</i>
	Gal Markel, M.D., Ph.D.	Chaim Sheba Medical Center	<i>Endogenous Cellular Regulation Mechanisms of CEACAM1 Expression in Melanoma</i>
	Ariel Munitz, Ph.D.	Tel-Aviv University	<i>The Role of Paired Immunoglobulin-Like Receptor B (PIR-B) in Colorectal Cancer</i>
	Ronit Satchi-Fainaro, Ph.D.	Tel-Aviv University	<i>Targeted Anticancer-Antiangiogenic Polymer Therapeutics to Dormant-Aggressive Tumor Pairs</i>
	Oren Schuldiner, Ph.D.	Weizmann Institute of Science	<i>The Role of the Tumor Suppressor Gene UVRAG in Developmental Neuronal Remodeling</i>
	Yaron Shav-Tal, Ph.D.	Bar-Ilan University	<i>Cyclin D1 Proto-Oncogene Promoter Control: A Kinetic Analysis of Gene Activity Using In Vivo Imaging</i>
POSTDOCTORAL FELLOWSHIPS	Inbal Avraham-Davidi, Ph.D.	Weizmann Institute of Science	<i>Elucidating the Role of Angptl3 in Early Tumor Lymphangiogenesis</i>
	Osnat Bartok, Ph.D.	Hebrew University of Jerusalem	<i>Is the Onco-miR Bantam the Link between the Cell Cycle and the Circadian Clock?</i>
	Regina Golan-Gerstl, Ph.D.	Hebrew University/Hadassah Medical School	<i>Characterization of hnRNP A2/B1 as a Proto-Oncogene in Brain Cancer</i>
	Liat Goldberg, Ph.D.	Chaim Sheba Medical Center	<i>ERG Targets in Acute Megakaryoblastic Leukemia - from Function to Therapeutics</i>

AWARD	AWARDEE	INSTITUTION	PROJECT TITLE
POSTDOCTORAL FELLOWSHIPS <i>(continued)</i>	Guy Malkinson, Ph.D.	Weizmann Institute of Science	<i>Analysis of Novel Lymphangiogenesis Regulators in Zebrafish for Targeting of Tumor Growth</i>
	Zaidoun Salah, Ph.D.	Hebrew University/Hadassah Medical School	<i>WWOX Signaling in Breast Carcinogenesis</i>
	Seth Salpeter, Ph.D.	Hebrew University/Hadassah Medical School	<i>Investigating Cysteine Cathepsin Activity in Metastatic Cancer using Activity Based Probes</i>
	Keren Yacobi-Sharon, Ph.D.	Weizmann Institute of Science	<i>A Novel Noncanonical Cell Death Pathway in Drosophila</i>
PROJECT GRANTS	Osnat Ashur-Fabian, Ph.D.	Tel-Aviv University	<i>Antagonizing Thyroid Hormones-avb3 Interaction: A Novel Therapeutic Approach in Myeloma</i>
	Gil Ast, Ph.D.	Tel-Aviv University	<i>When Epigenetics Meets Splicing</i>
	Haim Azhari, D.Sc.	Technion, Israel Institute of Technology	<i>Contrast-Material Induced Nonlinearity Through-Transmission Ultrasonic Breast Imaging</i>
	Michal Baniyash, Ph.D.	Hebrew University/Hadassah Medical School	<i>SNX9-TCR Crosstalk under Normal and Chronic Inflammatory Conditions: Implication in Cancer</i>
	Ittai Ben-Porath, Ph.D.	Hebrew University/Hadassah Medical School	<i>EZH2 as a Regulator of the Stem/Progenitor-Like Identity of Basal-Like Breast Cancers</i>
	Avri Ben-Ze'ev, Ph.D.	Weizmann Institute of Science	<i>The Role of Ezrin in L1-Mediated Colon Cancer Metastasis</i>
	Limor Broday, Ph.D.	Tel-Aviv University	<i>Effects of SUMO Protease on Developmental Pathways with Oncogenic Potential</i>

AWARD	AWARDEE	INSTITUTION	PROJECT TITLE
PROJECT GRANTS <i>(continued)</i>	Benjamin Dekel, M.D., Ph.D.	Chaim Sheba Medical Center	<i>Deciphering the Role of WNT Signaling in Novel Wilms' Tumor Stem Cells</i>
	Rivka Dikstein, Ph.D.	Weizmann Institute of Science	<i>Mechanistic Basis of Cancer-Associated Persistent NF-kappaB Activity</i>
	Amir Eden, Ph.D.	Hebrew University of Jerusalem	<i>The Molecular Basis of Snf5 Mediated Tumorigenesis – A Key Role for IGFR-AKT Signaling</i>
	David Engelberg, Ph.D.	Hebrew University of Jerusalem	<i>Revealing the Role of the p38 MAPK in Cell Death Induced by Chemotherapy</i>
	Abraham Fainsod, Ph.D.	Hebrew University/Hadassah Medical School	<i>Integration of Signaling Networks in the Regulation of Stem Cell Self-Renewal</i>
	Michael Friedman, Ph.D.	Hebrew University of Jerusalem	<i>Development & Pharmacokinetic Study of Local Sirolimus Systems for Oral Cancer Prevention</i>
	Gideon Gross, Ph.D.	MIGAL-Galilee Technology Center	<i>A Combined Genetic Approach for Improving Adoptive T Cell Therapy of Cancer</i>
	Yoav Henis, Ph.D.	Tel-Aviv University	<i>Interactions and Endocytosis of Growth-Inhibitory Receptors</i>
	Shai Izraeli, M.D.	Chaim Sheba Medical Center	<i>Modeling CRLF2 and JAK2 Signaling in Leukemia Initiation</i>
	Nathan Karin, Ph.D.	Technion, Israel Institute of Technology	<i>The Role of CCR5 Ligands in Cancer of the Prostate</i>
Jeremy Kark, M.D., Ph.D.	Hadassah Medical Organization	<i>Adolescent Precursors of Adult Cancer in Israel - A National Resource</i>	

AWARD	AWARDEE	INSTITUTION	PROJECT TITLE
PROJECT GRANTS <i>(continued)</i>	Shulamit Katzav-Shapira, Ph.D.	Hebrew University/Hadassah Medical School	<i>Vav1: A Dr. Jekyll and Mr. Hyde Protein – Good for the Hematopoietic System, Bad for Cancer</i>
	Martin Kupiec, Ph.D.	Tel-Aviv University	<i>Telomere Length Control and Genome Stability</i>
	Anna Mattout, Ph.D.	Hebrew University of Jerusalem	<i>Chromatin in Somatic Cell Reprogramming into Induced Pluripotent Stem Cells</i>
	Eran Meshorer, Ph.D.	Hebrew University of Jerusalem	<i>The Role of Chromatin Remodeling Factors in Embryonic and Cancer Stem Cells</i>
	Oded Meyuhas, Ph.D.	Hebrew University/Hadassah Medical School	<i>The Role of Ribosomal Protein S6 Phosphorylation in Tumorigenesis</i>
	Ami Navon, Ph.D.	Weizmann Institute of Science	<i>Engineering a Novel Class of Proteasome Inhibitors for Treatment of Multiple Myeloma</i>
	Gera Neufeld, Ph.D.	Technion, Israel Institute of Technology	<i>Characterization of the Mechanisms by Which RAMP3 Mediates Loxl2 Induced Tumor Progression</i>
	Amir Orian, M.D., Ph.D.	Technion, Israel Institute of Technology	<i>Targeting the SUMO Pathway/RNF4 in Myeloma</i>
	Ophry Pines, Ph.D.	Hebrew University/Hadassah Medical School	<i>Fumarate Hydratase: The Relationship between Primary Metabolism, DNA Damage, and Cancer</i>
	Shoshana Ravid, Ph.D.	Hebrew University/Hadassah Medical School	<i>The Tumor Suppressor Lgl, A Regulator of Cell Polarity</i>
Yoram Reiter, Ph.D.	Technion, Israel Institute of Technology	<i>A Systems Approach for Studying and Manipulating the Reactivity of Immune Cells to Cancer</i>	

AWARD	AWARDEE	INSTITUTION	PROJECT TITLE
PROJECT GRANTS <i>(continued)</i>	Rony Seger, Ph.D.	Weizmann Institute of Science	<i>Development of Phosphomimetic Mutants of PEDF as Potent Anti-Angiogenic, Anti-Cancer Drugs</i>
	Yuval Shaked, Ph.D.	Technion, Israel Institute of Technology	<i>Role of Microparticles Mediating Rebound Tumor Angiogenesis Following Chemotherapy</i>
	Yosef Shaul, Ph.D.	Weizmann Institute of Science	<i>Yap and Taz, and the Switch from Pro- to Anti-Cancer Activity</i>
	Tomer Shlomi, Ph.D.	Technion, Israel Institute of Technology	<i>Targeting Cancer via a Top-Down Computational Study of its Metabolism</i>
